## Footnotes:

<sup>1</sup> This total represents the total number of unique provider numbers with suspended claims for that category. Therefore, a provider may have claims counted in several categories resulting in total that is less than the cumulative of the services.

<sup>2</sup> In most instances the amount paid generally ranges between 40 - 60% of the billed amount, excluding nursing homes. Nursing homes are generally paid at the amount billed less any recipient liability and/or insurance coverage.

<sup>3</sup> The significant changes made to the payment system for HIPAA transactions has resulted in numerous payment difficulties. The dept. requires the assistance of the Information Technology Division to make the necessary computer changes and we are subject to their overall time demands and scheduling.
